

aicore™ cloud, GÜNTNER'S
NEW IOT-SOLUTION IS
NOW AVAILABLE.

THE IOT-GATEWAY aicore™ LINK CAN
BE SELECTED IN MYGPC NOW!

YOUR BENEFITS OF aicore™ cloud

Quick information on components and spare parts

Safeguarding of service quality independently of a possible shortage of skilled workers

Remote diagnosis, the knowledge of specialized employees can be used more effectively for more systems

Automated fault analysis and notifications in case of anomalies or errors

Optimization of maintenance through information about load behavior and operating times

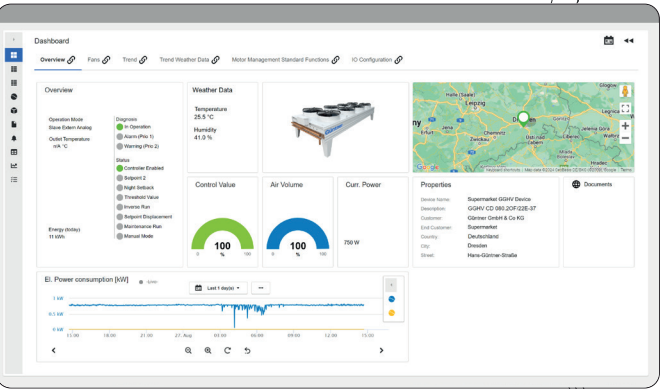

COST-EFFECTIVE INTELLIGENT EASY

WITH PLUG & PLAY ALL GÜNTNER UNITS 24/7
UNDER TOTAL CONTROL!

aicore™ cloud is available for all condensers, gas and dry coolers with Güntner controller and is delivered ready to use. By registration on the IoT-platform, you gain access very easy to all information of your units, which are sent by the Güntner IoT-gateway aicore™ link via cellular radio. Güntner will take care of the complete management of the plug & play system for you.

Retro-fitting of existing older systems is also possible.

aicore™ cloud

aicore™ cloud FUNCTIONS

- Graphical view of the unit
- Monitoring of parameters and settings
- Operational and alarm messages
- Analysis and representation of the load
- Historical energy and water consumption data
- Operating times and status information
- Evaluation of the fan's status and health
- Load behavior of the system
- Remote maintenance with digital operational analysis and system monitoring
- Detailed report about consumption data or e.g. sound power information
